

SHANEEZA HASNANI

Fraud Analytics Data Scientist | Certified Fraud Examiner

(210) 935-7217 | hasnani.shaneeza@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Certified Fraud Examiner and data scientist using Python, R, SQL, and machine learning to detect financial crime and reduce false positives. Experience across fraud analytics, financial crime investigations, consulting, and government, with a focus on turning transaction data into findings that support investigations and compliance decisions.

TECHNICAL SKILLS

- **Programming & Data:** Python, R, SQL, C++
- **Machine Learning:** Random Forest, Logistic Regression, Decision Trees, Anomaly Detection, Predictive Analysis
- **Visualization & BI:** Snowflake, Tableau, Microsoft Power BI, Excel, SPSS
- **Tools and Platform:** Jupyter, R Studio, VSCode, Github, UiPath, Google Apps Script, Airtable

PROFESSIONAL EXPERIENCE

Schmidt Special Competitive Studies Project (SCSP)

Jan 2026 - May 2026

Research Assistant

Washington, DC

- Built a dashboard in Google Apps Script that integrated Airtable, Google Sheets, and third-party APIs into one system for company research, cutting meeting prep time by 50%
- Automated a daily intelligence pipeline that pulled sponsor news from multiple sources into one digest, eliminating 3 hours of manual research each week
- Managed action item tracking across 30+ sponsor companies and delivered weekly summaries used by leadership for planning, cutting planning time by 30%

EduGuide Overseas Pvt. Ltd.

Aug 2024 - Dec 2025

Fraud Data Analyst

Mumbai, India

- Developed anomaly detection models in Python and R using Random Forest and Logistic Regression, improving fraud detection accuracy by 25% and catching fraudulent activity earlier than manual review alone
- Created a Python model that classified 200K+ transactions by fraud risk each month, helping reduce the investigation backlog and speed up fraud review
- Analyzed 500+ payment datasets monthly using SQL and Python, identifying patterns that reduced false positives and streamlined the review process
- Reduced suspicious student applications by 20% annually through automated risk-scoring pipelines
- Designed Power BI dashboards that automated fraud reporting and cut review time by 15%

Guidehouse, Inc.

Jun 2024 - Aug 2024

Financial Crime & Investigative Services Intern

New York City, NY

- Analyzed 20,000+ ACH and wire transfers using SQL and Python to identify suspicious transaction patterns and reduce false positives
- Cleaned and engineered transaction features in SQL and pandas, enabling the fraud-risk model to achieve higher detection accuracy
- Identified 50+ high-risk transaction patterns using SQL queries and anomaly detection, supporting compliance investigations
- Integrated machine learning outputs into transaction risk scoring, improving compliance monitoring by 30%

State of New York, Office of the Attorney General, Medicaid Fraud Control Unit

Jun 2023 - Aug 2023

Fraud Audit Intern

Hauppauge, NY

- Identified \$500K+ in recovery anomalies using SQL and statistical validation
- Leveraged prescriptive analytics to accelerate fraud case resolution by 20%

PROJECTS

Fraud Detection Pipeline, Snowflake and Python

- Built a three-layer fraud detection pipeline in Snowflake that processed 6.3 million PaySim transactions end to end in SQL
- Engineered three behavioral fraud features in SQL, including origin account balance zeroing and unchanged destination balances after funds were received, and validated each feature against ground-truth fraud labels
- Built a rule-based fraud scoring model that tiered 6.3 million transactions into HIGH, MEDIUM, LOW, or MINIMAL risk, with the HIGH-risk tier capturing 76% of actual fraud against a 0.13% baseline fraud rate

EDUCATION

Kogod School of Business, American University

Dec 2026

Master of Science, Business Analytics & AI | Concentration in Data Science and Statistics

Washington, DC

- **Coursework:** Statistical Machine Learning, Advanced Text Analytics with AI and Machine Learning, Applied Managerial Statistics, Databases and AI, Business Intelligence, Predictive Analytics with Machine Learning, Business Insights through Analytics, Quantitative Methods and Data Analysis in Finance

CUNY John Jay College of Criminal Justice

May 2025

Bachelor of Science, Fraud Examination and Financial Forensics | Minor in Computer Science

New York, NY

CERTIFICATIONS

- Certified Fraud Examiner (CFE)
- UiPath Academy: Agentic Automation Developer Associate
